Backend Development

- Runtime Environment: Node.js
- Framework: Express.js
- Architecture: RESTful APIs, Environment Configuration (.env)

Databases

- NoSQL: MongoDB,Firebase
- SQL: PostgreSQL, MySQL,SQLite

Development Tools & IDEs

- IDEs: VS Code, IntelliJ IDEA, Android Studio
- Tools & Platforms: Git, GitHub, Postman, Antigravity,Cursor

Mobile Development

- React Native, Expo, Android (Java),

EDUCATION

O/L Exam |
Walisinha Harischandra College, Anuradhapura | 2015

G.C.E. Ordinary Level |
Walisinha Harischandra College, Anuradhapura | 2019

Graduate – Software Engineering (BEng Hons) |
IIC University (Java Institute for Advanced Technology)| 2021 – 2025

ABOUT ME

Graduated BEng in Software Engineering from IIC University, with hands-on experience in mobile and full-stack development. Skilled in Java, Android, React Native, Next.js, Firebase, and backend systems, with a strong focus on building real-world, user-centered applications. Currently awaiting certificate completion from the Java Institute of Advanced Technology. A motivated and adaptable software engineer with a solid work ethic, strong teamwork and communication skills, and the ability to quickly learn and apply new technologies. Passionate about continuous learning, UI/UX design, and delivering high-quality digital solutions

WORK EXPERIENCE

Web Projects 2024-2026

- Ceylon POS Demo (Live) – Interactive web-based Point of Sale dashboard with real-time order calculation.
- Ceylon Heritage Travels (Live) – Dynamic travel portal featuring curated tour packages and custom booking inquiries.
- Seycey Travel & Tours (Live) – Mobile-first travel platform with responsive itinerary exploration.
- Seycey Visa & Tours (Live) – Comprehensive visa advisory and tour management web interface.
- Ceylon Trails (Live) – Adventure itinerary and tour package web application.
- Temple Tree Web App (Live) – Clean, component-based frontend for hospitality service showcases.
- Manu Life Studio Web App (Live) – Full-stack wellness platform with a modern frontend, booking management, package management, availability scheduling, gallery, and admin functionality.
- Omar Lanka Tours Web App (Live) – Modern travel and tourism frontend featuring tour packages, destinations, vehicle services, and integrated inquiry/booking experiences.

Mobile projects

Food Delivery App | Cross-Platform Mobile Application

- Tech: React Native (Expo), REST APIs, State Management

Built an interactive food ordering and delivery app featuring real-time menu browsing, cart management, and seamless order workflows.
GitHub: Velora

Ticket Booking App | Full-Stack Mobile Solution

- Tech: React Native (Expo), Mysql, FlashList, Expo Router, Java

Built a full-stack booking app with secure JWT-authenticated Spring Boot REST APIs and interactive ticket management.
GitHub: Ticket Booking App

Offline-First POS App | Mobile Sales Solution

- Tech: React Native (Expo), SQLite, TypeScript

Developed an offline-first Point of Sale (POS) mobile application utilizing SQLite for robust local data persistence and instant transaction processing.
GitHub: Offline-First POS App

ADDITIONAL INFORMATION

LANGUAGES: ENGLISH, SINHALA,

I possess a versatile technical background rooted in **Object-Oriented Programming (OOP)** and **Design Patterns (OODP)**, ensuring the delivery of scalable and maintainable software solutions. My expertise extends across **C#/.NET** application development, **IoT development** and customization, complemented by a strong focus on **SEO** to maximize digital reach. Furthermore, I am highly proficient in leveraging **Vibe Coding** and AI-assisted development tools to rapidly prototype and deploy high-quality web and mobile applications. Currently, I am collaborating with a professional team at **Braintisa** on various client-facing projects**, while preparing to pursue a Master's degree to further enhance** my engineering expertise and technical leadership.
